Subject: 1/27/21 Weekly COVID Newsletter

The infection rates continue to decline slowly, and as allowed, operations and activities will restart.

Thank you to everyone that tested on campus or provided results. We will have tested over 500 cadets and employees. Many of the tests are still being run by the lab, but the first 200 are all negative.

Please remember to stay vigilant with regard to the following protocols:

- Wear a face covering at ALL TIMES
- Wash or sanitize your hands FREQUENTLY and before eating or touching your face. Carrying a small container of sanitizer is a great idea.
- Physically distance. This is our updated term for “socially distance” because it enhances mental well being if we continue to be social.

We have developed a great new tool to help to make submitting work orders for repairs, cleaning, or replenishing supplies quick and easy. You will see these posted in all the classrooms and gathering spaces across campus. Point your smartphone camera and submit your request.

Remember to complete your Daily Symptom Check <https://www.csum.edu/alert/covid-19/covid-check.html>

EVERYTIME you come to campus or leave your on-campus residents.

Lots of new COVID information is available at <https://www.csum.edu/alert/covid-19/>, so stay informed. We have an updated plan for Spring, more reference links, meeting minutes, and more.

- **We still recommend you use California’s exposure notification system.** If you go to <https://canotify.ca.gov/> you can activate it on your phone. This system was designed to rapidly identify and inform people who have had close contact (greater than 15 minutes and less than 6 feet) with a person who was determined to be positive for Covid-19. It is a great tool to keep you informed.

Please email questions, comments, or suggestions to covid19hs@csum.edu
