Subject: 04/21/21 Weekly COVID Newsletter

Vaccinations are now available for everyone 16 years of age and up in most counties in California.

KQED has done an excellent job summarizing and linking vaccination opportunities in the Bay Area. Click on this link for more information: [Find Vaccination Opportunities NOW](#)

Please remember that there is now a streamlined process to obtaining approval and ensuring our guests are symptom-free and well-versed on our safety measures for those bringing guests, visitors, or contractors to campus. Please visit [COVID website](#) To use the program.

The final Random COVID testing of the semester will be held this Thursday, April 22nd. **You should continue testing whether vaccinated or not.**

If you have been vaccinated outside of the campus event, we still encourage and appreciate it if you let us know. Students/cadets send information to studenthealth@csum.edu and employees to covid19hs@csum.edu. All information is confidential.

As of today, we have 1 cadets in offsite isolation, 0 cadet in onsite isolation, 0 cadet in offsite quarantine, and 0 cadets in onsite quarantine. In addition, we have 0 employees in isolation and 0 employees in quarantine.

The following table represents our testing efforts and results since January 2021. It does include external results submitted. We will continue to keep this table updated and include it in our weekly newsletter. As always, we truly appreciate all your efforts and cooperation in helping keep our community safe.

| Month | # of COVID Tests | # Isolated | # Quarantined |
|-------|------------------|------------|---------------|
|-------|------------------|------------|---------------|

| | | | |
|----------|--------|---|----|
| January | 699/ 1 | 1 | 0 |
| February | 258/4 | 6 | 21 |
| March | 154/ 0 | 1 | 0 |
| April | 187/0 | 2 | 0 |
| May | / | | |

Isolation separates sick people with a contagious disease from people who are not sick.

Quarantine separates and restricts the movement of people who were exposed to a contagious disease to see if they become sick. In the second column is the # COVID tests administered, and that came back negative in green with positives in red.

We continue to add information to the [COVID website](#) and encourage cadets to share this information with family and provide feedback on any additional information that would be helpful during this difficult time.

Please email questions, comments, or suggestions to covid19hs@sum.edu
