

Flu and COVID-19 Information

Environmental Health & Safety <safety@csum.edu>

Tue 4/19/2022 9:09 AM

Dear Campus Community,

The end of the semester is in sight! As finals, commencement, and the summer training cruise are fast approaching, we want to ensure that our campus community remains safe and healthy. As is occurring across the state of California, we have also noted a slight uptick in flu and COVID-19 cases on campus in the past week. Our current COVID-19 policies are not changing; however, we are sharing this information so you can consider voluntarily engaging in safety measures such as masking indoors.

While the reduced severity of the current [COVID-19](#) cases is resulting in fewer hospitalizations and deaths than caused by previous variants, a positive COVID-19 test result nevertheless could impact an individual's normal routine for a week or more, as mandated by the California Department of Public Health. We will continue to monitor the situation on our campus and surrounding community and will communicate any updates or changes in our campus COVID-19 policy as needed. As always, take care of yourself and others.

Sincerely,
Craig Dawson, CHMM
Manager of Environmental Health & Safety
