SUBJ: COVID-19 Campus Update

COVID Confirmed Cases

-

Cal Maritime received notification over the weekend that one of our employees tested positive for COVID-19, bringing the total count of known positive employee COVID tests to two. This result was detected in private medical testing last week.

In both instances, we have consulted with and sought guidance from Dr. Rebecca Miller, Interim Director of Health Services and Dr. Bela Matyas, Medical Director for Solano County, to ensure compliance with health and safety protocols and practices.

The most recent employee who tested positive has been asymptomatic so far. As per the recommendation of Solano County Public Health, we have notified the individuals at risk of exposure from this second positive case.

Matters such as these are great reminders of the importance of consistent practice of protective measures including:

- wearing appropriate PPE,
- maintaining social distance,
- periodic hand washing with soap and water,
- avoiding touching your eyes, nose or mouth with unwashed hands, and
- staying home if you feel respiratory symptoms such as a cough or a fever.

The Health & Safety Task Force (HSTF) is very appreciative of the proactive steps of making us aware of these developments. As a reminder, if any cadet, faculty, or staff exhibit COVID-related symptoms, please see Cal Maritime's Health Services or your primary physician for help. If you are asymptomatic and have not been in direct, prolonged contact with someone who has tested positive for COVID-19, you are considered by public health officials to be at low risk; **however, please continue to monitor your health.**
