AC Transit is valued as a leader that helps the Bay Area thrive by connecting East Bay communities to each other and to regional destinations. We are committed to a service structure that directs resources to rider groups with the greatest need and also offers the greatest opportunity to support car-free urban living in the Inner East Bay. We expect that the customer experience in using the system is safe, reliable, fast, clean, and pleasant. We deliver safe, reliable, sustainable transit service that responds to the needs of our customers and communities.

- Ryan Marr-Wyatt
  Service Project Manager, San Francisco
About ACCO Engineered Systems
ACCO Engineered Systems has been annually recognized by a national industry magazine as one of the top-10 specialty contractors in the United States, and the leader in its mechanical contracting field for the Western United States. We have a diverse environment of skilled professionals - field construction workers, engineering, project managers, service technicians, and supporting staff - who collaborate together and make ACCO an engaging place to work.

ACCO History
ACCO Engineered Systems was founded in 1934 as Air Conditioning Company (ACCO), a proprietorship, by Ira Prentiss Fulmor at 1005 Santa Fe Street, Los Angeles. The former name of the company was chosen to indicate what the company did because few people knew about air conditioning. In 1949, the business moved from downtown Los Angeles to Glendale where it transformed from an air conditioning distributor to become an independent corporation. After 70 years in Glendale, ACCO moved to its headquarters to 888 East Walnut Street in Pasadena. Jeffrey Marrs became ACCO’s fifth President & CEO in 2016.

Over the years ACCO has expanded its leadership role in the design, installation, and service of industrial, commercial, high-rise, residential, and institutional air conditioning, heating, ventilation, plumbing, process piping, electrical and DDC control systems. ACCO’s name was changed in 2002 to ACCO Engineered Systems to better reflect the many aspects of its business. A national trade publication has consistently ranked ACCO among the 3 largest heating, ventilating, and air conditioning contractors in the nation. The company, including its subsidiaries, has an average of 3,000 employees, and offices and manufacturing campuses that occupy more than 20 acres, spanning 32 locations.

ACCO’s mechanical systems occupy facilities in a wide variety of industries, including commercial office space, biopharmaceutical R&D, semi-conductor, micro-electronics, medical/healthcare centers, manufacturing plants, entertainment, retail, telecommunications, education, data centers, and high rise residential.

American Cruise Lines

Booth #70
American Cruise Lines is the largest cruise line in the U.S. As a small ship cruise line, we are able to offer guests a customized experience on each of our 35 plus itineraries which visit the most captivating destinations in the Pacific Northwest, Alaska, New England, the Southeast, and the Mississippi River region.

The gracious hospitality and personalized service of the American Cruise Lines staff is what we are known for, as is the exquisite cuisine prepared each day by our master chefs. On board and ashore, we work with our guests to accommodate specific interests, tastes, and needs.

Our motto is Small Ship Cruising Done Perfectly®

American Maritime Officers Union
601 S. Federal Highway
Dania Beach, FL 33004-4109
www.amo-union.org
- Capt. Kathleen Friel
  Career Advancement Liaison
  786-350-8160, kfriel@amo-union.org

American Maritime Officers is the largest union of U.S. merchant marine officers. AMO officers work aboard U.S.-flagged merchant and military sealift vessels, and AMO holds a unique presence in the international energy transportation trades.

AMO officers work in a broad range of domestic and international trades aboard U.S.-flagged vessels in the deep-sea sector, including oil and product tankers, containerships, roll-on/roll-off ships, heavy-lift ships, trailer ships, general cargo vessels and the only U.S.-owned fleet of undersea cable installation and repair ships.

AMO officers also work aboard Military Sealift Command's large, medium-speed roll-on/roll-off ships, and aboard military prepositioning vessels, fast sealift ships, product tankers, Ready Reserve Force ships and several others operated by private-sector ship managers for Military Sealift Command and the Maritime Administration.

AMO represents the officers and stewards in the majority of the U.S. Great Lakes fleets. AMO also has collective bargaining agreements covering scores of ocean-going and harbor tugs and inland waters vessels.

The mighty rivers of the United States of America once served as the great highways of early exploration and inspired dreams of discovery. Today, American Queen Steamboat Company re-creates the same sense of wonder, excitement and inspirations with all the convenience and comfort of modern luxury aboard uniquely American, iconic paddlewheel riverboats: the American Queen, American Empress, American Duchess and American Countess. There are a variety of opportunities onboard our vessels and in our corporate office.

Carbon Robotics is pioneering the next revolution in agriculture through the deployment of innovative technology and hardware. Carbon Robotics’ first product, the Autonomous LaserWeeder, is purpose built to tackle one of the industry’s biggest problems: weed control. By leveraging artificial intelligence and laser technology, Carbon Robotics’ revolutionary, high-precision approach improves crop yield, provides safer working conditions for farmers, reduces overall costs associated with modern farming, and creates sustainable paths to regenerative and organic produce. Carbon Robotics was founded in 2018 and is based in Seattle.
CBRE Group, Inc., a Fortune 500 and S&P 500 company headquartered in Los Angeles, is the world’s largest commercial real estate services and investment firm. The company has more than 100,000 employees and serves real estate investors and occupiers through more than 530 offices worldwide.

At CBRE Portland, we manage Oregon Health and Science University’s South Waterfront Campus, consisting of 2.5+ Mil square feet of healthcare, academic, and research facilities.

About Chubb:
Chubb is the world’s largest publicly traded property and casualty insurer. With operations in 54 countries, Chubb provides commercial and personal property and casualty insurance, personal accident and supplemental health insurance, reinsurance, and life insurance to a diverse group of clients. The company is distinguished by its extensive product and service offerings, broad distribution capabilities, exceptional financial strength, underwriting excellence, superior claims handling expertise, and local operations globally.

Chubb is looking for an aspiring insurance professional to join our Chubb Associate Program. As the industry leader in Property & Casualty insurance, Chubb is an employer of choice for a student aspiring to develop a meaningful career in a fast-paced, diverse company.

We have designed our Chubb Associate Program to hone your skills and talents and help you reach your career goals. By joining the Chubb Associate Program, you will be part of an experience that supports the well-rounded development of critical business skills which in turn contributes to the future success of our company. Our blended program is designed to include hands-on business assignments in a variety of disciplines, interactive classroom instruction, team assignments, and direct interaction with other early-career professionals as well as with many of our senior executives. As part of this program, you will receive:

- Challenging assignments and the opportunity to contribute to the result of a team.
- Business training unique to a career at Chubb.
- Technical training to deepen your skill level within your chosen discipline, and an understanding of our broader industry.
- Interpersonal effectiveness training to help you gain strong communication and interactive skills.
- Access to additional training to compliment your professional development.

We are excited about and committed to the Chubb Associate Program because we believe that we are developing talented professionals with the potential to become Chubb’s leaders of the future.

Chubb strives to offer a diverse and inclusive and rewarding work environment. Teamwork and mutual respect are central to how Chubb operates and we believe the best solutions draw upon diverse perspectives, experiences, and skills. We operate in such a way where everyone, regardless of their singular background has the opportunity to contribute to our collective success.

Chubb offers a competitive compensation package and comprehensive benefits package including life, health and dental, vision, a generous retirement savings plan, disability coverage, stock purchase plan, flexible spending accounts, tuition reimbursement, and business casual dress. At Chubb, we are committed to equal employment opportunity and compliance with all laws and regulations pertaining to it. Our policy is to provide employment, training, compensation, promotion, and other conditions or opportunities of employment, without regard to race, color, religion, age, sex, sexual orientation, transgender, national origin, disability, genetic information, veteran, or marital status, or any other characteristic protected by law.

Recognized Worldwide for Diverse and Dynamic Marine Transportation Solutions
Founded as Edison Chouest Boat Rental in Galliano, Louisiana, in 1960, the Edison Chouest Offshore companies (ECO) are recognized today as the most diverse and dynamic marine transportation solution providers in the world.
ECO operates a growing fleet of well over 200 vessels, ranging from 87 to over 525 feet in length, serving an expanding global customer base.

Staying on the forefront of new technologies is an integral part of the Chouest business plan, as evidenced by recent advances in the areas of subsea support, integrated bridge systems and global communications.

The ability to design, build, own and operate diverse, high-capacity and technologically superior vessels has made ECO an unrivaled leader in the maritime industry.

  510-364-1403, stephanie.a.wittler@ehi.com

If you’re looking to start your career with a company that grows their managers and leaders from within the organization, then the Enterprise Management Training Program is for you. Whether you see yourself in sales, business development, customer service or operations, this program will prepare you to create your ideal career. As a Management Trainee, you can count on a defined career trajectory with a clear beginning and an open end — meaning you can take your training and shape your future. And with our promote-from-within philosophy, you will have plenty of opportunities to advance without ever having to change companies.

Water is essential to life and livelihood. By its very nature, water is a natural solvent. It’s the natural enemy to the vessels that store it, the pipes that transport it, and the equipment that uses it. Garratt-Callahan supplies more than water treatment chemicals; we deliver expertise for the care, management, and support industrial water systems. G-C experts assist our clients to treat their boilers, cooling towers, reverse osmosis systems, and wastewater. We protect their employees and equipment.

GSH Group is a premier provider of Integrated Facilities Management, with our competency being self-delivery of mechanical maintenance, stationary engineers, and workplace wellness services. At 126-years and growing, we are time-tested industry leaders in all facets of maintaining and operating a diverse portfolio of industrial, commercial, government, and private real estate around the world. Global provider of facilities management and maintenance.
Harbor Industrial / Dockside Machine & Ship Repair

211 North Marine Avenue
Wilmington, CA 90744

- Vanessa Stager
  Executive Administrator
  310-549-8030, vstager@marinetechserv.com

- Matt Mossinger
  General Manager, Dockside Machine
  310-879-3654, mmossinger@docksidemachine.com

Harbor Industrial - Our team is composed of Service Engineers and Technicians with diverse disciplines in Industrial, Mechanical, Electrical, Automation, Structural Welding and Marine Engineering Services. We pride ourselves on our excellent safety record and our unequalled technical, engineering and managerial support. Through our mechanics, welders and technicians, our work encompasses both hardware and software throughout the entire life cycle of any project.

We believe in Quality Practices and have strong beliefs as evidenced in our commitment to Quality Practices.

Dockside Machine & Ship Repair - We have the team, the equipment and the expertise for efficient (emergency) service on both diesel and steam powered ships. We have been in the business for over 55 years and are located in the heart of Los Angeles and Long Beach harbor. Rely on us for rush and emergency jobs. We operate on a around the clock basis, seven days a week. Maintaining a fleet of trucks, portable welding machines and equipment for shipboard services. Backed by a fully equipped machine shop, welding fabrication shop, hydraulic shop and an insulation shop.

Depend on us to complete a job with the least number of men and man-hours. Dockside has a cadre of experience licensed marine engineers and skilled machinists, welders, and electricians. Our labor force is the largest in the area that can be readily deployed to meet all Ship Repair & Maintenance needs.

Facility Services including Operations and Maintenance Engineering, Janitorial, and Sustainability.
Our Mission
The U.S. Navy’s Military Sealift Command is the premier provider of ocean transportation to the Department of Defense. The Command operates approximately 125 civilian-crewed ships that replenish U.S. Navy ships, conduct specialized missions, strategically preposition combat cargo at sea around the world and move military cargo and supplies used by deployed U.S. forces and coalition partners.

While we do play a critical role in support of our nation’s defense, our employees are not active duty members of the military. MSC civil service mariners (CIVMARs), the largest segment of our global workforce, are federal civil service employees.

All CIVMARs are employed by the Navy to serve MSC onboard naval auxiliaries and hybrid-manned warships worldwide, in peace and war. MSC exists to support the joint warfighter across the full spectrum of military operations. MSC provides on-time logistics, strategic sealift, as well as specialized missions anywhere in the world, in contested or uncontested environments.

We recruit transitioning military, merchant marines, maritime academy graduates, and skilled entry-level candidates to fill our maritime job opportunities. The MSC mission is big. So are the rewards for the CIVMARs who help us complete it.

MSC Benefits
“Advance your career further, faster” is the result of key components that characterize a career with MSC: job security, training, and advancement opportunities. When these elements are combined in a supportive work environment that encourages growth, you can Take Command of Your Career®. But an MSC career offers more than professional growth and secure employment. Read on to learn what makes MSC the career you’ll want to have, and the career you’ll want to keep.

Career Advancement Opportunities
Experience the pride that comes with professional and personal growth.

As one of the largest maritime organizations in the world, we have numerous positions to fill. Many of these are your opportunity to advance to the next level professionally and earn more income. Upon completing your four month tour, there are no limits to the time you spend underway in advancing your career.

Training
Pursue professional advancement opportunities with confidence in your abilities.

We have an interest in seeing CIVMARs advance their careers. To support this, we offer opportunities for both on-the-job and formal training. Allowing CIVMARs to expand sea-time, experience, and skill-sets needed for advancement.
Federal Job Security and Paid Leave
Relax with the peace of mind that comes with stable employment and steady income.

Compared to the private sector, federal employment is known for unmatched job security. When your tour ends, you don't need to worry about finding your next job. You remain an MSC employee when your tour ends, and while on leave you will continue to collect your base salary. Your position is secure and waiting for you when it’s time for your next ship assignment.

World Travel
Gain new perspectives on life when you explore foreign lands and experience new cultures.

MSC goes where the U.S. military goes—all over the world. While some people pay thousands of dollars to visit foreign countries, MSC offers the opportunity to travel the globe AND earn a good income while doing so. While we're in port, once you are done with your day’s responsibilities, you're free to explore and visit the foreign landmarks you've only heard about as long as you return according to your ship's orders.

Camaraderie
Embrace the unique bond that forms between crew members working selflessly to complete the mission.

It takes a tight-knit crew to efficiently complete mission after mission—a crew that looks after one another and supports each other on and off the clock. Over time as you work together and live together, a unique bond forms. Within that bond there is trust. There's an understanding that regardless of your differences and cultural backgrounds, you can rely on your fellow CIVMAR.

NOAA Commissioned Corps
8403 Colesville Road, Suite 500
Silver Spring, MD 20910
https://www.omao.noaa.gov/learn/noaa-commissioned-officer-corps

- Jessica Spruill
  Junior Officer, NOAA Ship Fairweather
  770-778-1366, jessica.spruill@noaa.gov
- Kelly Wooten
  Junior Officer, NOAA Ship Fairweather
  541-867-8919, kelly.wooten@noaa.gov

The NOAA Commissioned Officer Corps (NOAA Corps) is one of the nation’s eight uniformed services. NOAA Corps officers are an integral part of the National Oceanic and Atmospheric Administration (NOAA), an agency of the U.S. Department of Commerce, and serve with the special trust and confidence of the President.

With approximately 340 officers, the NOAA Corps serves throughout the agency’s line and staff offices to support nearly all of NOAA’s programs and missions. The combination of commissioned service and scientific expertise makes these officers uniquely capable of leading some of NOAA’s most important initiatives.

The NOAA Corps is part of NOAA’s Office of Marine and Aviation Operations (OMAO) and traces its roots to the former U.S. Coast and Geodetic Survey, which dates back to 1807 and President Thomas Jefferson. In 1970, NOAA was created to develop a coordinated approach to oceanographic and atmospheric research and subsequent legislation converted the commissioned officer corps to the NOAA Corps.

The NOAA Corps today provides a cadre of professionals trained in engineering, earth sciences, oceanography, meteorology, fisheries science, and other related disciplines. Corps officers operate NOAA’s ships, fly aircraft, manage research projects, conduct diving operations, and serve in staff positions throughout NOAA.
NOAA’s Office of Marine and Aviation Operations  
8403 Colesville Road, Suite 500  
Silver Spring, MD 20910  
www.omao.noaa.gov  
- Tom Martin  
  Chief of OMAO Civilian Personnel Management Division  
  301-713-7894, thomas.d.martin@noaa.gov

NOAA is the largest operator of Federal research vessels. NOAA offers a diversified fleet, which involves a variety of missions and offers job security, good pay, and the benefits of being a civil service employee.

Having a career as a Professional Mariner with NOAA is to be an integral part of understanding the condition of the ocean and atmosphere. NOAA Mariners add a seaman’s know-how to NOAA’s scientific research by directly participating in the operation and handling of scientific gear in the tumultuous ocean environment. NOAA’s fleet of 15 research ships operate world-wide in direct support of NOAA’s diverse environmental information programs, environmental stewardship services and applied scientific research. The highly-skilled and technical workforce provides NOAA the ability to achieve success in the conduct of nautical charting, bathymetric mapping, fisheries research, ecosystem assessments, marine environment baseline assessments, coastal-ocean circulation, and oceanic and atmospheric research. Enjoy an exciting career while gaining experience and training to advance your mariner or personal credentials.

Significant opportunities exist for cutting edge training in diving, medical care at sea, shipboard scientific operations, hazardous materials, small boat operations, advanced technologies and more. There is the ability to move within the fleet as opportunities arise and historically regular annual pay raises enhance these positions even more.

Northern California Power Agency  
651 Commerce Drive  
Roseville, CA 95678  
https://www.ncpa.com  
- Elizabeth Gonzalez  
  HR Manager  
  916-781-4209, Elizabeth.Gonzalez@ncpa.com  
- Randy Bowersox  
  Assistant General Manager  
  916-781-4209, Randy.Bowersox@ncpa.com  
- Marc Pelletier
The Northern California Power Agency (NCPA), a California Joint Action Agency, was established in 1968 by a consortium of locally owned electric utilities to make joint investments in energy resources that would ensure an affordable, reliable, and clean supply of electricity for customers in its member communities. NCPA members include municipalities, a rural electric cooperative, and other publicly owned entities for which the not-for-profit agency provides such services as the purchase, aggregation, scheduling, and management of electrical energy.

Most critically for its 16 members, NCPA over the past four decades has constructed and today operates and maintains a fleet of power plants that is among the cleanest in the nation, and that provides reliable and affordable electricity to more than 700,000 Californians. NCPA made a major investment in renewable energy in the early 1980s when it developed two geothermal power plants and financed and built a 250 megawatt hydroelectric facility. Thirty years later, these resources continue to generate reliable, emission-free electricity for its member communities.

NCPA’s 796 megawatt portfolio of power plants is approximately 55% greenhouse gas emission-free. NCPA’s mix of geothermal, hydroelectric, and natural gas resources is well positioned to help its members achieve California’s policy of a 60% Renewable Portfolio Standard (RPS) by 2030. NCPA member utilities also have invested heavily in the most environmentally friendly form of electricity—the megawatts that you don’t use. The agency’s members collectively have spent more than $220 million on energy efficiency since 2006, reducing demand for electricity by nearly 670 gigawatt hours during that time.

NCPA’s commitment to the environment reflects its status as a not-for-profit public entity whose policies and values are set not by investors, but by locally elected or appointed officials who serve as the energy regulators in the cities, towns, and districts that are members of the Agency.

Because these individuals live and work in their communities, and remain directly accountable for the utility service to their customers (and neighbors), they provide a knowledgeable, responsive and effective governing body. With that combination of industry knowledge and commitment to the environment, NCPA has scored some notable “firsts” in environmental stewardship:

The world’s first integrated wastewater geothermal system, which reversed years of declining steam production at the geothermal facility and prolonged the life of one of the state’s most important sources of renewable generation.

The first entity in the U.S. to install “fast start” combined-cycle natural gas turbines that not only are highly efficient but also are designed to facilitate the integration of new intermittent renewables, such as solar and wind, and help California meet its ambitious renewable portfolio standard targets.

• Kendra Staggs
Senior Nuclear Auxiliary Operator

Palo Verde Generating Station has been the nation’s largest power producer for nearly 30 years – all of it clean and carbon-free. As the heart of the APS generation fleet, it provides the foundation for the reliable service our customers know they can count on. The plant is a critical asset to the Southwest, generating more than 32 million megawatt-hours annually – enough power for more than 4 million people.

Shaver has the largest, most advanced and most powerful fleet of ship assist tugs on the Columbia River. We constantly reinvest to upgrade and improve our fleet to better serve newer and larger vessels, and to meet stricter safety and environmental regulations. Our modern, well-maintained fleet includes seven tractor tugs, all with the latest in propulsion and control technology, and with Bollard Pull of over 100,000 lbs. and horsepower ranging from 3,000 to 8,400.

Our dispatchers operate 24 hours a day at our headquarters in Portland, Oregon. It is our goal to provide a knowledgeable and skilled team to assist all ships and to meet our customers' timelines, even during extreme weather conditions and unforeseeable situations. Shaver is proud of our well-earned reputation for prompt efficient service as the safest and most reliable choice for your Columbia River ship assist requirements.

Today, Shaver Transportation employs 140 dedicated and experienced people. We recognize it is the employees who have made Shaver Transportation a successful company. We continue to look for individuals who are motivated, reliable, and talented, with maritime career goals.

• Michael Pignati

Siemens Industry, Building Technologies, Automation

We spend up to 90% of our lives in buildings, and we believe that everything people do in life deserves a perfect place to do it. In a world where our fundamental health, safety and wellbeing expectations have been deeply impacted with the anxiety of a new virus, buildings should offer a haven. Ideally, a perfect place to grow, learn and prosper.

While it’s true today's buildings should be reliable, efficient and safe - these characteristics alone don't enable businesses and empower people the way a true smart building can. Adaptability is crucial. Smart buildings interact with people, systems and external elements around them. They learn from the past experiences and real time data input. They adapt to the needs of people and the businesses within them by increasing comfort, efficiency, resiliency and safety.

Whatever the size of the building, it's purpose or application: Our comprehensive building automation and control systems portfolio allows us to perfectly tailor an automation and control solution to each project’s individual needs. Openness and flexibility are the bottom line for all of our systems. As a result, open communication protocols enable their easy integration with other systems and the option to modernize later on. Combining electrical and HVAC systems in a comprehensive, multiple discipline approach and designing for reliability - this is how perfect places become a reality.
As one of the nation's largest MEP building systems experts, Southland Industries provides innovative, practical results for your engineering, construction, service, and energy needs. Optimizing each stage of the building lifecycle with our in-house expertise, we connect to your business strategy by delivering holistic solutions.

Strategic Sealift Midshipman Program (SSMP)
200 Maritime Academy Drive
Vallejo, CA 94590
The SSO community merges the expertise of the merchant mariner with the warfighting capabilities of a naval officer. In peacetime, the merchant mariner represents the economic strength of our nation, while in times of conflict, the SSO represents the ability to project and sustain the combat power of our nation.

**About the SSOP Detachment 71**

Our mission is to develop mentally, morally, and physically fit officers imbued with the highest ideals of duty and loyalty for service in the U.S. Navy Reserve.

The SSOP offers license-track students additional training, certification, leadership, and career opportunities that go beyond what a normal student receives.

As part of their naval science curriculum, Midshipmen frequently interact and network with industry, government, and military leaders through a curated lecture series. Upon completion of the required courses, Midshipmen also earn a Minor in Naval Science.

SSO Midshipmen can look forward to a career as a navy reserve officer, serving two weeks of active duty per year as a merchant marine subject matter expert to the navy. In addition, there are many opportunities to volunteer for long-term orders both in the United States and at overseas duty stations such as Singapore, Japan, Italy, Hawaii, Bahrain, and many others.

Upon commissioning, SSOP officers can enjoy many of the same benefits as their active duty counterparts, including pension, GI Bill, VA benefits, additional pay, and healthcare.

SSO Midshipmen set the standard for all cadets on campus and are leaders not only within the Unit but within the entire campus community.

**SUNY Maritime College**

6 Pennyfield Avenue  
Throggs Neck, NY 10465  
https://www.sunymaritime.edu/  

- Marissa Santomaso  
  Assistant Director of Graduate Admissions  
  718-409-7201, msantomaso@sunymaritime.edu

Our campus is located in New York City, one of the most exciting cities for the entertainment, the financial district, greatest global marketing center of the world and most importantly essential hub for the maritime industry. PayScale.com rates SUNY Maritime College as one of the best colleges for return on investment. SUNY Maritime College boasts one of the lowest tuitions of any college while yielding one of the highest mean salaries of graduates among all colleges and universities.

The Master of Science in International Transportation Management is a logistics, supply-chain, and inter-modal program. International transportation management is a 34-credit program that prepares students for advanced positions within the maritime industry, as well as in logistics and supply chain management positions. The program may be completed online, on campus or a blend of the two formats, to make it fit with a variety of schedules and learning preferences. Students may choose to earn additional certificates in charter parties or supply chain management, as well as a U.S. Coast Guard third mate’s unlimited license.
The Master of Science in Maritime and Naval Studies is a humanities focused program for those that have a passion for the sea. Literature, history, art, music, law, and environmental issues comprise this unique and wonderful opportunity.

In 40 short years, we’ve become one of the world’s leading elevator companies with unique engineering capabilities. When done well, urban mobility drives down congestion, pollution, stress and energy consumption. Our innovative, efficient and reliable passenger transportation systems are key to getting it right in cities. Whether building a new state-of-the-art system or modernizing an existing one, our products deliver crucial energy and time efficiencies. We want to move people safely, comfortably and efficiently – today and in the future.

Trident Seafoods
5301 Shilshole Ave NW
Seattle, WA 98221
https://www.tridentseafoods.com/

Pat Cummings
Vessel Staffing Manager, Human Resources
206-321-1513, pcummings@tridentseafoods.com

Trident Seafoods was founded over 40 years ago and we are proud to have grown to be the largest vertically integrated seafood company in North America. We are a family-owned company with over 9,000 employees worldwide. Trident Seafoods is based out of Seattle, but has processing plants across the United States, Europe, Japan, and China. The real heartbeat of Trident Seafoods, however, is its access to the natural resources in the remote coastal communities of Alaska. We have a unique heritage, talented employees and a company culture founded on the “can do” spirit. Trident believes that our employees are the most foremost reason for our success, allowing us to be the leader in the Seafood industry.

Maintenance Manager

The world’s second-largest family-owned winery and fourth-largest overall, Trinchero Family Estates (TFE) comprises more than 50 award-winning wine and spirits brands distributed in nearly 50 countries around the globe. Founded in 1948—when Italian immigrant Mario Trinchero brought his young family from New York City to Napa Valley and purchased an abandoned Prohibition-era winery called Sutter Home in St. Helena—Trinchero Family Estates has been an innovator for seven decades. Today, Trinchero Family Estates remains deeply rooted in Napa Valley, encompassing a broad portfolio of global offerings, including flagship brands Sutter Home Family Vineyards and Ménage à Trois; luxury brands Trinchero Napa Valley, Napa Cellars and Neyers Vineyards; partner brands Joel Gott Wines, Charles & Charles and Bieler Père et Fils; import brands San Polo, Angove Family Winemakers, Avissi Prosecco, Echo Bay, Finca Allende and Terras Gauda; and Spirits and Specialty Beverage brands Hanson of Sonoma Organic Vodka, Tres Agaves Organic Tequila, Tres Agaves Organic Cocktail Mixers, Amador Whiskey and Trincheri Vermouth. Headquartered in Napa Valley for more than 70 years, Trinchero Family Estates is comprised of more than 1,100 team members, five northern California tasting rooms and numerous California wineries. Trinchero
Family Estates’ production facilities span Trinchero Central Coast to the south, Main Street winery and Luxury Winemakers’ Studio to north, and Westside winery and Terra d’Oro to the east.
