510-346-4300, kshin@accoes.com
- Taylor Deschene, Lead Engineer-- San Leandro-Engineering  
510-346-4300, tdeschene@accoes.com

Recruiter Identified Major(s): ME

### *About ACCO Engineered Systems*

ACCO Engineered Systems has been annually recognized by a national industry magazine as one of the top-10 specialty contractors in the United States, and the leader in its mechanical contracting field for the Western United States. We have a diverse environment of skilled professionals - field construction workers, engineering, project managers, service technicians, and supporting staff - who collaborate together and make ACCO an engaging place to work.

ACCO offers complete in-house engineering, fabrication, installation, commissioning, and service capabilities. This integrated delivery system provides customers with the most practical, cost effective solutions for their particular mechanical and control system requirements.

ACCO is licensed in the States of Arizona, California, Florida, Hawaii, Idaho, Nevada, Oregon, Utah and Washington.

ACCO's driving force is to satisfy the complex, engineered systems needs of buildings/facilities. We do this in a valued-added, cost effective one-stop shop manner by:

- Using our best in class know how to deliver customized, value-added systems at a competitive level
- Structuring exceptional value deals
- Leveraging our Project Management and delivery capability to take control, deliver with speed, and provide a single point of accountability

**Air Treatment Corp.**

**Booth #30**

640 N. Puente Street

Brea, CA 92821

[www.airtreatment.com](http://www.airtreatment.com)

- Elliot Benson, Sales Engineer  
925-389-7522, [ebenson@airtreatment.com](mailto:ebenson@airtreatment.com)
- Mario Trujillo, VP of Northern CA  
831-818-3353, [mtrujillo@airtreatment.com](mailto:mtrujillo@airtreatment.com)

Recruiter Identified Major(s): ME, FET

Air Treatment Corporation is the leading HVAC & R manufacturer's representative serving California, Nevada, Hawaii, Oregon and Guam since 1982.

For 40 years, ATC has partnered with first-rate equipment manufacturers to deliver expert, sustainability-driven equipment, factory-certified service, and end-to-end support within our wide distribution network.

We serve numerous markets, including cold storage and food processing, data centers, higher education, and sports areas. Our divisions include HVAC equipment, refrigeration, OEM service, and parts.

What makes us different? We've shaped how businesses, contractors, and industry professionals work with HVAC & R manufacturer representatives. Our team of experts includes sales engineers, inside support teams, and certified technicians that use their industry knowledge and tools to be your reliable specialists in energy and water-saving solutions.

We connect manufacturers, customers, contractors, builders, and designers through an in-depth understanding of HVAC & R equipment, personalized customer service, and relationship building that delivers long-term business results.

Find out why the industry trusts us.

***CSC Vision***

Chevron Shipping is a world-class marine services company and a global leader in safety and sustainability. Our talented and empowered workforce enables higher returns across Chevron by providing cost-competitive marine transportation, managing marine risk, and delivering marine functional expertise.

***Right People for Marine Solutions***

Since building our first tanker in 1895, we have evolved into a world-class global marine services company, specializing in oil and gas marine solutions. We provide safe, reliable and cost-competitive marine transportation and expert technical, commercial and marine operations support to Chevron's customers and affiliates worldwide. In addition, Chevron Shipping Company is ISO 14001:2015 certified for the management of Chevron's operated fleet vessels.

***Who We Are***

We currently employ 1,625 seafarers and 325 shore-side personnel dedicated to supporting Chevron's marine requirements. Our operated fleet consists of conventional crude tankers and product carriers, as well as high-technology ships and liquefied natural gas (LNG) carriers. Shore-side staff provide critical marine functional support, with marine specialists embedded within Chevron business units in 20 different countries.

Recruiter Identified Major(s): ALL MAJORS

CSU Maritime Academy prepares students for successful careers in the fast-paced and exciting fields of International Business, Logistics, Marine Engineering and Technology, International Strategy and Security, Maritime Affairs, Global Studies, Transportation, Oceanography, and Transportation and Engineering Management.

The M.S. in Transportation & Engineering Management, with concentrations in Transportation, Engineering Management, and Humanitarian Disaster Management, is offered fully online to accommodate the busy schedules of working adults. Developed and delivered in close collaboration with business and industry, the curriculum provides a mix of theory and creative real-world applications to prepare students to succeed in a challenging and changing global market.

New this fall is the Graduate Certificate in Emergency Management. The Emergency Management Certificate focuses on risk assessment and decision-making processes in mitigation, preparedness, and adopted disaster response actions at the local and national level, public-policy creation, and includes an emphasis on program evaluation within a research-based theoretical framework.

Genesis Marine is safe, reliable and efficient with the right equipment for your marine transportation needs. We primarily serve refineries and storage terminals along the Gulf Coast, East Coast, Canada, Great Lakes, Intracoastal Canal and western river systems of the United States, including the Red, Ouachita and Mississippi Rivers on which Genesis has significant existing terminals.

Genesis Marine owns and operates two fleets, inland and offshore, including approximately 130 vessels. Our state-of-the-art barges coupled with the best liquid cargo mariners make us the safest, most efficient carrier of inland, hot-oil cargoes. Our inland fleet consists of approximately 82 barges and 33 push-boats and our offshore fleet consists of nine boats and nine barges and one ocean going tanker. We have a total design capacity of 2.3 mmbbl for Inland Marine Operations, 0.9 mmbbl for Offshore Marine Operations and 0.3 mmbbl for the M/T American Phoenix (ocean-going tanker).

Wilmington, CA 90744

<https://harborindustrial.com>

<http://docksidemachine.com/index.html>

- Vanessa Stager, Executive Administrator

Recruiter Identified Major(s): MET, ME, FET, IBL

Harbor Industrial - Our team is composed of Service Engineers and Technicians with diverse disciplines in Industrial, Mechanical, Electrical, Automation, Structural Welding and Marine Engineering Services. We pride ourselves on our excellent safety record and our unequalled technical, engineering and managerial support. Through our mechanics, welders and technicians, our work encompasses both hardware and software throughout the entire life cycle of any project.

We believe in Quality Practices and have strong beliefs as evidenced in our commitment to Quality Practices.

Dockside Machine & Ship Repair - We have the team, the equipment and the expertise for efficient (emergency) service on both diesel and steam powered ships. We have been in the business for over 55 years and are located in the heart of Los Angeles and Long Beach harbor. Rely on us for rush and emergency jobs. We operate on a around the clock basis, seven days a week. Maintaining a fleet of trucks, portable welding machines and equipment for shipboard services. Backed by a fully equipped machine shop, welding fabrication shop, hydraulic shop and an insulation shop.

Depend on us to complete a job with the least number of men and man-hours. Dockside has a cadre of experience licensed marine engineers and skilled machinists, welders, and electricians. Our labor force is the largest in the area that can be readily deployed to meet all Ship Repair & Maintenance needs.

### **NOAA Commissioned Officer Corps**

**Booth #33**

1315 East West Highway, 10th Floor

Silver Spring, MD 20910

<https://www.oma.noaa.gov/noaa-corps>

- LTJG Kevin Tarazona  
kevin.tarazona@noaa.gov

Recruiter Identified Major(s): ALL MAJORS

The NOAA Commissioned Officer Corps (NOAA Corps) is one of the nation's eight uniformed services. NOAA Corps officers are an integral part of the National Oceanic and Atmospheric Administration (NOAA), an agency of the U.S. Department of Commerce, and serve with the special trust and confidence of the President.

With approximately 330 officers and growing, the NOAA Corps supports nearly all of NOAA's programs and missions. The combination of commissioned service and scientific expertise makes these officers uniquely capable of leading some of NOAA's most important initiatives.

The NOAA Corps traces its roots to the former U.S. Coast and Geodetic Survey, which dates back to 1807 and President Thomas Jefferson. The corps was established in 1917 as a commissioned service of the U.S. Coast and Geodetic Survey, whose mission was to provide critical environmental intelligence to the nation both in times of war and peace. In 1970, NOAA was created to develop a coordinated approach to oceanographic and atmospheric research and subsequent legislation converted the commissioned officer corps to the NOAA Corps. Learn more on the Our History page.

After initial selection, officer candidates receive basic training at the NOAA Corps Training Center at the U.S. Coast Guard Academy in New London, Connecticut. Upon successful completion of the training program, officers are commissioned as ensigns and start their career with NOAA marine or aviation operations. All of our officers serve aboard NOAA ships and/or aircraft during their career. About 80 percent of NOAA Corps officers go to sea.

While at sea, NOAA Corps officers operate ships that map the seafloor, monitor oceanographic and atmospheric conditions, and support fisheries research. Our aviators pilot NOAA's aircraft, including Twin Otters, King Airs, and our famous P-3 Orion and Gulfstream IV "hurricane hunters." These aircraft collect data essential to hurricane and flood prediction, nautical charting, disaster response, and resource management.

When not at sea or in the air, NOAA Corps officers apply their operational experience, expertise, and training to advance new technologies, lead program and project teams, and respond to severe weather events, oil spills, and other emergencies.

Officers have the ability to tailor their career to specific interests and aspirations. The NOAA Corps has qualifications for uncrewed system operators, divers, and small boat handlers.

Officers in land assignments support nearly every part of NOAA, facilitating scientific efforts as small boat operators, divers, logistics coordinators, liaisons, and more. As an officer's career progresses, so does their level of responsibility and leadership.

The National Oceanic and Atmospheric Administration (NOAA) operates a wide assortment of hydrographic survey, oceanographic research and fisheries survey vessels. These vessels are operated by NOAA's Office of Marine and Aviation Operations.

The ships are run by a combination of NOAA commissioned officers and civilian professional mariners. The civilian mariners include licensed masters, mates and engineers, and unlicensed members of the engine, steward and deck departments. In addition, survey and electronic technicians operate and/or maintain the ship's mission, communication and navigation equipment. The ship's officers and crew provide mission support and assistance to embarked scientists from various NOAA laboratories as well as the academic community.

Driven by a Relentless Desire to Deliver

In 1934, Earl Sr. and Lillian Congdon founded Old Dominion Freight Line in Richmond, Virginia, with one truck and a steadfast commitment to keep their promises to customers. Since then, a great deal of work has gone into turning OD into a leader in the freight business. The philosophy of “helping the world keep promises” still guides us to this day as the entire OD family carries on the tradition of helping our customers succeed.

International And Domestic Vessel Operators with Diverse Commercial And Government Shipping Expertise  
Established in 1981, Seaward Services, Inc. (SSI), a subsidiary of Hornblower Corporation, is a full-service shipping, waterfront logistics and management company that specializes in the operation and maintenance of government and commercial vessels; including: high-speed craft, range craft, training craft, experimental craft, research vessels, cable-laying vessels, and unmanned surface and sub-surface vessels. The organization is led by seasoned maritime executives and management with many years of experience within commercial shipping, the U.S. Coast Guard, and U.S. Navy. SSI has distinguished itself in the industry as a reliable, safe, and effective maritime vessel owner and operator.

Seaward's niche expertise lies in high-speed, jet-powered shipping. Since 2001, the organization has crewed, operated, and maintained a wide variety of high-speed vessels in support of DoD contracts, including the: HST WestPac Express, USNS Guam, USNS Puerto Rico, FSF-1 Sea Fighter, HSC Alakai, and sea trials for the Independence-Variant LCS and Spearhead Class EPF's. Seaward has also operated traditional deep-water vessels for various DoD contracts such as the OSV Hercules out of Dutch Harbor and the O&M for the TSV's Prevail, Hugo, Hunter, and Narragansett which provided training support to the US Navy.

Recruiter Identified Major(s): FET, ME, MET

Siemens Industry, Building Technologies, Automation

We spend up to 90% of our lives in buildings, and we believe that everything people do in life deserves a perfect place to do it. In a world where our fundamental health, safety and wellbeing expectations have been deeply impacted with the anxiety of a new virus, buildings should offer a haven. Ideally, a perfect place to grow, learn and prosper.

While it's true today's buildings should be reliable, efficient and safe - these characteristics alone don't enable businesses and empower people the way a true smart building can. Adaptability is crucial. Smart buildings interact with people, systems and external elements around them. They learn from the past experiences and real time data input. They adapt to the needs of people and the businesses within them by increasing comfort, efficiency, resiliency and safety.

Whatever the size of the building, it's purpose or application: Our comprehensive building automation and control systems portfolio allows us to perfectly tailor an automation and control solution to each project's individual needs. Openness and flexibility are the bottom line for all of our systems. As a result, open communication protocols enable their easy integration with other systems and the option to modernize later on. Combining electrical and HVAC systems in a comprehensive, multiple discipline approach and designing for reliability - this is how perfect places become a reality.

Our campus is located in New York City, one of the most exciting cities for the entertainment, the financial district, greatest global marketing center of the world and most importantly essential hub for the maritime industry. Payscale.com rates SUNY Maritime College as one of the best colleges for return on investment. SUNY Maritime College boasts one of the lowest tuitions of any college while yielding one of the highest mean salaries of graduates among all colleges and universities.

The Master of Science in International Transportation Management is a logistics, supply-chain, and inter-modal program. International transportation management is a 34-credit program that prepares students for advanced positions within the maritime industry, as well as in logistics and supply chain management positions. The program may be completed online, on campus or a blend of the two formats, to make it fit with a variety of schedules and learning preferences. Students may choose to earn additional certificates in charter parties or supply chain management, as well as a U.S. Coast Guard third mate's unlimited license.

The Master of Science in Maritime and Naval Studies is a humanities focused program for those that have a passion for the sea. Literature, history, art, music, law, and environmental issues comprise this unique and wonderful opportunity. The program can be completed entirely online and is 31 credits.

America's Navy is approximately 450,000 Sailors, 300 ships and submarines, and 3,700 aircraft strong.

Water and salt flow through our veins in the same proportion as the sea. That mighty force is the lifeblood of the greatest Navy ever to sail unstopably upon it, slip stealthily beneath it or fly unchallenged above it. And we defend with honor, courage, and commitment every hour of every day.

We are America's Navy. We are forged by the sea.

We lead in our industry by understanding yours.

Technically, we're in the facility services industry – but we believe we're really in the relationship industry. Developing long-lasting partnerships means offering more than unmatched management expertise. It means having a deep knowledge of your business and a thorough understanding of your goals. This unique combination enables us to customize our services and tailor our approach to meet your goals and objectives.

Excellence without exception.

At UG2, our vision is to set the new standard of excellence – and create the next generation of leadership in the facility services industry. By working as an extension of your team, we are committed to developing the strongest customer relationships and the highest service delivery benchmarks in the marketplace.

Everything we do is meant to:

Set a new standard of excellence in facility services with innovative solutions, pristine environments, and a passion for customer service.

Support efforts to become the facilities “partner of choice” for the most demanding and prestigious customers in North America.

Create the next generation of facilities service leaders by hiring customer-centric PHDs (Passionate, Hardworking, Dedicated) people.

Forge long-lasting partnerships with our customers centered around helping them become successful leaders in their markets.

Ensure we are the industry leader in innovation, technology, safety and sustainability.

Recruiter Identified Major(s): OCN, MT, MET, ME

The U.S. Academic Research Fleet (ARF) is made up of 17 research vessels varying in specifications, range, and requirements. These vessels are facilitated through UNOLS, a consortium of 58 U.S. academic institutions and national laboratories involved in oceanographic research. The vessels use cutting-edge instrumentation to support all types of oceanographic research from the ocean floor to the ocean-atmosphere interaction. The work is diverse and no two science missions are the same.

**University of the Pacific, McGeorge School of Law**

**Booth #78**

3200 5th Avenue  
Sacramento, CA 95817  
<https://law.pacific.edu/law>

Recruiter Identified Major(s): ALL MAJORS

University of the Pacific, McGeorge School of Law has become an internationally recognized leader in the field of legal education since its establishment in 1924. Its location in Sacramento, the capital of California, has shaped its focus on public law, international law and advocacy.

McGeorge prides itself on providing students with a broad range of legal curricular opportunities, including our Certificates of Concentration (Business, Capital Lawyering, Health, Intellectual Property, International, Tax, Trial & Appellate Advocacy, and Water & Environmental), and our Centers of Distinction (Capital Center for Law & Policy, Center for Advocacy & Dispute Resolution and Global Center for Business Development. Our JD/MPP or JD/MPA dual degree programs offer students an opportunity to simultaneously engage in the study of law and public policy or public administration further emphasizing an institutional understanding and commitment to public service.

Opportunities for International Study, the Fast Track Water Law JD/LLM Program, and our broad array of electives and experiential opportunities are available to round out the student experience.

Whichever course of study students choose, our student-focused faculty will share their enthusiasm for the law through engaging classes, using the same lawyering skills that are deployed in practice. A campus environment of support and cooperation encourages collegiality, and graduates of our JD program are equipped to continue learning from experience as they build their legal career.

Recruiter Identified Major(s): MT, MET

Established in 1919, Weeks Marine, Inc. is one of the largest marine, dredging and tunneling contractors in North America and has successfully completed projects throughout North and South America, from inland waterways to offshore sites in the Pacific and the Atlantic. Weeks Marine has three key divisions – Construction, Dredging and Marine Services – which are bolstered by three major subsidiaries, Healy Tibbitts Builders, Inc., McNally International, Inc. and North American Aggregates.

Weeks Marine's vast reach and deep expertise, combined with the sheer size and diversity of its equipment fleet, enables the company to serve as a one-stop shop for clients in both the private and governmental sectors, providing exceptional customer service, environmental sensitivity, operational efficiency, and a long-standing commitment to

safety. Weeks Marine is headquartered in Cranford, New Jersey, and manages a network of regional offices in Louisiana, Texas, Hawaii, Guam, Ontario, and Nova Scotia.
