

## Cruise Committee Meeting

1/11/21

Attendees: Grace Chou, John Coyle, Jessica Ryals, Don Maier, Scott GRre, Craig, Heather, David, Daniell, Lukas, Lachlan, Anthony k, fred, andrew, steve, wendy, Mitchel, lina

Discussion:

### **Quick announcements:**

- Cruise class codes have been created
  - CR121 and CR221
- Welcome to our new Chief Mate Jessica Ryals

### **Action Items from last week:**

1. Update on UV/Bi-polar ionization system for the ship (John Coyle and Med Staff)
  - a. Will be getting a proposal for new system this week, hopefully manageable cost
  - b. UV note- danger of producing ozone, but this system should not do this
  - c. Based on what has been read, bi-polar ionization should be our best bet
2. Roster updates (ET and MT Deans/Chairs)
  - a. SSO list (Commandants)
    - i. Draft descriptions are complete, just need to know how many of each slot to fill
    - ii. What should we advertise for?
      1. What about fresh grads for cruise 2?
        - a. They won't have license in time.
      2. At least 6 engineering watchstanders per cruise needed total- as many SSOs as possible
        - a. At least 3 'seasoned' full time engineers for LWO, 3 for ALWO can be just licensed
      3. Start with advertising for 3 watchstanders, if we need additional slots filled, we can go back to applicant pool
    - iii. MT- 4 SSO watchstanders per cruise needed
    - iv. Would be brought to campus a week prior to quarantine for ship familiarization, meet with faculty and staff, expectations, etc
3. Vaccine protocols- can we mandate for cruise IF we have vaccine available? (HR)
  - a. Working towards getting vaccines here
    - i. HOPEFULLY get vaccine to be able to be given here on campus, rather than having to go to our own providers
      1. Chief and Medical Team is working on it
  - b. Vaccine rollout slower than anticipated, will know more as the semester goes
  - c. Majority of cadets would likely want to get it

### **Other Discussion Items:**

- No smoking policy to be affect Cruise 2021- no smoking, chewing, vaping

- We need to make sure this is advertised to those applying for adjunct positions
  - Cadet perspective- put it out separately, not just in the handbook
  - Tampering with smoke detector in your room
  - Is it really the time to remove tobacco? This year has been stressful enough
    - It has been about 5 years since smoke-free campus
- Security drills- should we do these before the quarantine while everyone is here (including adjuncts/SSOs)?
  - Just need to be aware of timeline of finals, commencement, etc
  - Fire team should be assembled as soon as possible
- FYI to crew- Cadet leader applications will be out soon for cruise 2
- What ever happened to the cruise murals policy??
  - No update, COVID happened
  - Will likely follow the draft that has been created
  - Ask Captain, follow up with John
