

Notification Settings

Notifications are messages that are sent to students to notify them about an important upcoming To-Do, Event, Personal Reminder, or new Study Buddies messages in Passport Navigate.

A notification can be a **push notification** to a mobile device or an **email** message (text messages have not been enabled for Cal Maritime). Students must **opt in** to receiving notifications from Passport Navigate in order to receive any reminders. Students can set their preferences by clicking on “Settings” in either the app or [desktop](#), and then clicking on “Notification Settings”:

Students may choose more than one way to receive a notification. Personal Reminders notifications include notifications for upcoming to-do's, events and personal reminders. Study Buddy notifications include alerts from Study Buddy groups you've joined.

Tip! If you're not receiving notifications, but have opted into them in the app, please check notification settings on your smart phone to confirm they're enabled for the Navigate app.
