

Study Buddies

The Study Buddies feature allows students to connect with other students in their course sections who are interested in studying together outside of class. Study Buddies is available on the Passport Mobile app or the mobile app desktop version.

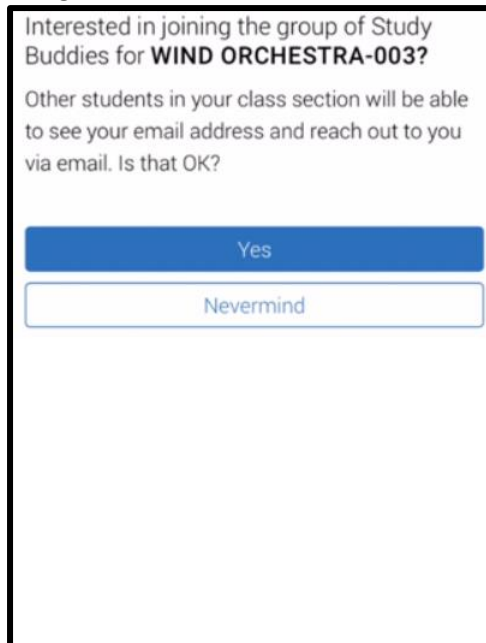

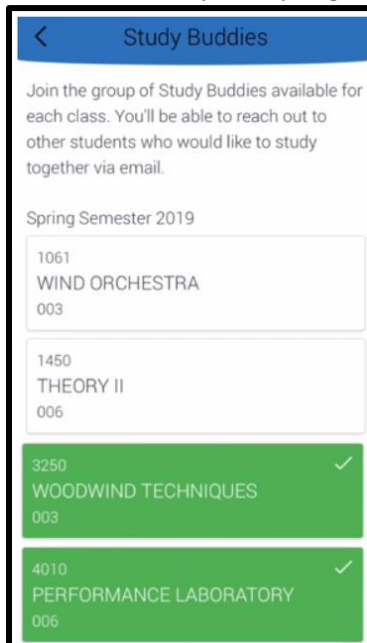

Passport Navigate App

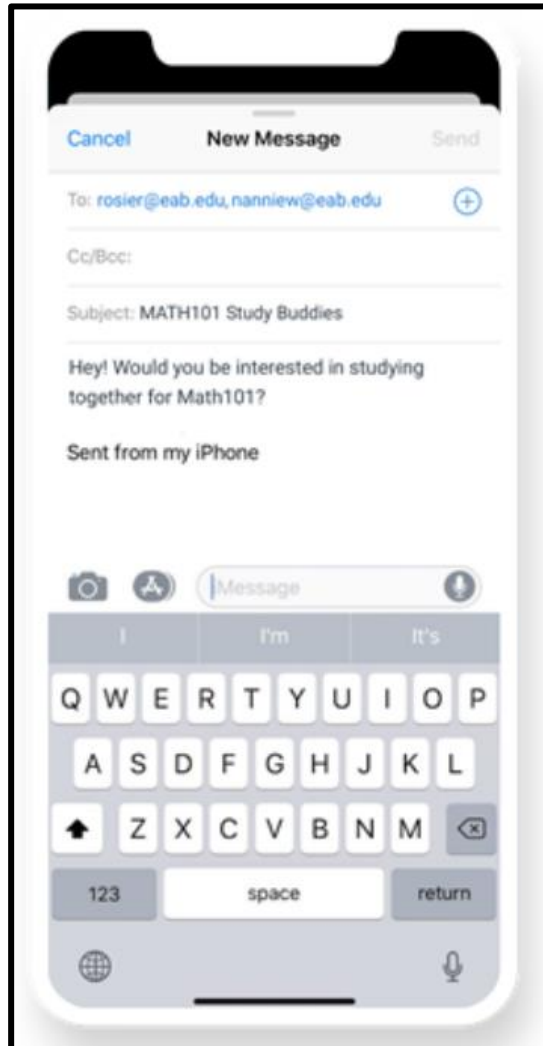

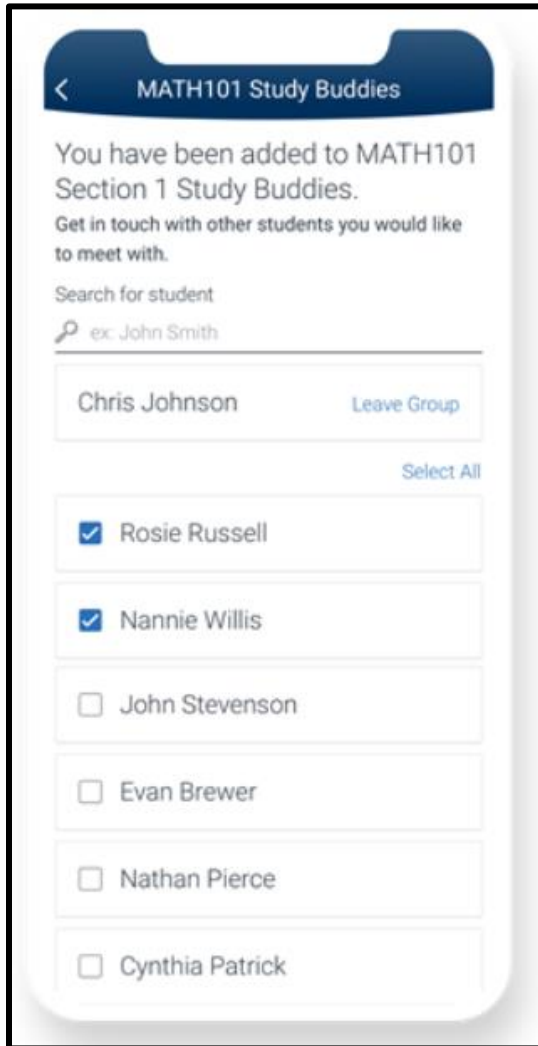

Passport Navigate Desktop

After clicking on the "Study Buddies" icon, students will see a list of class sections in which they are actively enrolled. Students can then select the course for which they wish to join a study group, and confirm that they are opting in to sharing their email address with other students in the class.

After joining the course group, students can then select the individuals in their class that they'd like to connect with via email. A pre-populated subject and body will appear: "Hey! Would you be interested in studying together for [class]?"

A student can leave the course's Study Buddies group on the app at any time. They simply select 'Leave Group' and their name will be removed from the Study Buddies list. Students can access Study Buddies, at any point in the term, and can rejoin groups after leaving them if they like.
